Takahashi A, Takase H, Toriyama T, Sugiura T, Kurita Y, Ueda R, Dohi Y.
Candesartan, an angiotensin II type-1 receptor blocker, reduces cardiovascular events in patients on chronic haemodialysis—a randomized study.
Nephrol Dial Transplant 21: 2507–12, 2006

Effects of ascorbic acid on ambulatory blood pressure in elderly patients with refractory hypertension.
Arzneimittelforschung 56: 535–40, 2006

Dohi Y, Takase H, Sato K, Ueda R.
Association among C-reactive protein, oxidative stress, and traditional risk factors in healthy Japanese subjects.
Int J Cardiol 115: 63–6, 2007 (published: 2006 Jun 5; [Epub ahead of print])

Comparison of heart to mediastinum ratio calculation between anterior and oblique images in 123I-MIBG scintigraphy.

Takase H, Toriyama T, Okado T, Tanaka S, Dohi Y.
Elevated levels of pulse wave velocity predict future development of hypertension in normotensive subjects.

Takase H, Toriyama T, Okado T, Tanaka S, Dohi Y.
Elevated brain natriuretic peptide levels predict a failure of cardioversion in patients with atrial fibrillation.

Takase H, Toriyama T, Okado T, Tanaka S, Dohi Y.
Does brain natriuretic peptide level serve as a marker of future development of hypertension?

Takase H, Toriyama T, Okado T, Tanaka S, Dohi Y.
Metabolic factors predict future development of hypertension in normotensive subjects

Dohi Y, Takase H, Yamashita S, Sato K, Ueda R.
Does pioglitazone further modify atherogenic process in diabetic patients receiving renin-angiotensin system inhibitors.

Suzuki F, Terada T, Kaneko M, Toriyama T, Okado T, Tanaka S, Takase H.
Relationship between brain natriuretic peptide levels and diastolic dysfunction in patients with chronic hemodialysis.

Quantitative assessment of myocardial 123I-BMIPP uptake in patients with ischemic and non-ischemic heart failure.

Dohi Y, Takase H, Sato K, Ueda R.
Pioglitazone exerts antiatherogenic effects in patients with hypertension and diabetes mellitus who are receiving angiotensin II receptor blockers.

Okado T, Toriyama T, Tanaka S, Suzuki F, Terada T, Kaneko M, Dohi Y.
Diastolic dysfunction increases B-type natriuretic peptide concentrations in patients with chronic hemodialysis.
